Peach Varieties of Known Parentage

Bred and Tested in New Jersey

GOLDENEAST

Propagated and Distributed by

THE NEW JERSEY PEACH COUNCIL, INC.

NEW BRUNSWICK, N. J.

Fall, 1947-Spring, 1948

The New Jersey Peach Council has available for Fall or Spring delivery a good supply of well grown, disease free, true to name peach trees of varieties bred and tested in New Jersey. There are varieties for every purpose and covering a harvesting season of approximately three months.

Place your order now while all of these varieties are available in the quantity and grade you desire to plant.

EARLY VARIETIES RIPENING BEFORE HILEY

EARLY EAST (N. J. 134)

This is a large, yellow-fleshed peach of high quality. It ripens about ten days before Golden Jubilee. The fruits develop an attractive red color, while still firm, and in long distance shipping condition. They remain in good condition for several days after they appear to be ripe. The dormant fruit buds are hardier than Elberta. Tree-ripened Early East at New Brunswick have been freestones. It has hardiness, productiveness, and attractiveness combined with good size, color, and quality. A promising new variety for the home or commercial orchard.

JERSEYLAND (N. J. 135)

This large, firm, attractive, yellow-fleshed freestone ripens a few days before Golden Jubilee. It resembles J. H. Hale, hangs well to the tree, and is an excellent shipper. It is far superior to Golden Jubilee as a commercial variety for shipment to wholesale markets. The tree is hardy, sets fruit buds freely, and comes into bearing early. The fruit freezes exceptionally well. It is ready for marketing before the market reacts to the pressure of the Golden Jubilee season.

CHERRY RED (N. J. 129)

A medium to large round non-melting yellow-fleshed clingstone which ripens at the same season as Red Bird. It colors well with red before it is ripe, is a dark red peach on the cheek with prominent splashes of red on the less exposed side. The flesh is orange-yellow, deeply stained with red. It can be picked and handled much the same as Red Bird. The flesh cooks well and makes an attractive red pie.

RARITAN ROSE (N. J. 97)

A firm, attractive, white-fleshed freestone of good quality, ripening a few days before Golden Jubilee. The tree is vigorous, hardy, and productive. The best early white of its season for the roadstand trade.

WILD ROSE (N. J. 118)

The best white-fleshed freestone to follow Raritan Rose. If you are offering a succession of white peaches on a roadside stand you need this one. The fruit is large, round-oval, well colored with red, and has a clear white flesh of high quality.

TRIOGEM (N. J. 70)

A firm, yellow-fleshed freestone of high quality, ripening two to three days later than Golden Jubilee. Very attractive and an excellent shipper. It is now popular as far south as Georgia.

ORDER BLANK

Date....., 194

To THE NEW JERSEY PEACH COUNCIL, INC.

Box No. 3-55,

R.F.D. No. 3, Princeton, New Jersey:

I would like to place an order for the following peach trees:

<i>Variety</i>	<i>No. Trees</i>	<i>Grade Preferred</i>
Early East (N. J. 134).....
Jerseyland (N. J. 135).....
Cherry Red (N. J. 129).....
Raritan Rose (N. J. 97).....
Wild Rose (N. J. 118).....
Triogem (N. J. 70).....
Newday (N. J. 79).....
Sunhigh (N. J. 82).....
Goldeneast (N. J. 87).....
Redrose (N. J. 98).....
Summer Rose (N. J. 101).....
Redcrest (N. J. 126).....
Summercrest (N. J. 94).....
White Hale (N. J. 63).....
Afterglow (N. J. 84).....
Late Rose (N. J. 109).....
Goodcheer (N. J. 152).....
Autumn (N. J. 145).....

LIABILITY AGREEMENT

Great care is used to avoid mistakes, but in case any trees prove to be untrue to the name under which they are sold, the original order will be replaced or the amount actually paid for such stock at the time of purchase will be refunded. The purchaser agrees to accept the trees on these terms.

NEWDAY (N. J. 79)

A firm, yellow-fleshed peach of good quality, ripening about a week later than Golden Jubilee. It resembles Elberta in color and shape, and the average size is larger than Triogem. Resistant to bacterial leaf spot.

SUNHIGH (N. J. 82)

A large, firm, attractive yellow-fleshed variety of good quality ripening a few days earlier than Goldeneast. Generally it is a freestone but sometimes the firm flesh adheres slightly to the pit when the fruit is hard ripe. The fruit buds are somewhat hardier than Goldeneast. A popular variety to precede Goldeneast.

MID-SEASON VARIETIES

GOLDENEAST (N. J. 87)

A very large, firm, attractive, yellow-fleshed freestone of high quality ripening about two weeks before Elberta. This has been a profitable variety in New Jersey because of its firm flesh, large size, and attractive appearance. This mid-August peach is hard to beat on the light peach soils from New Brunswick south in New Jersey.

REDROSE (N. J. 98)

A firm, attractive, highly-colored white-fleshed freestone of high quality ripening with Goldeneast. The trees are vigorous, productive, and hardy. For those who desire a good red-all-over, firm, white-fleshed peach to follow Wild-rose, this variety can be recommended.

SUMMER ROSE (N. J. 101)

The best large, oval, white-fleshed freestone to follow Redrose in New Jersey. The fruits resemble well-colored Belle of Georgia in shape and appearance, but are firmer, larger and earlier.

REDCREST (N. J. 126)

This large, firm, yellow-fleshed freestone ripens just before Elberta, or with Summercrest. It is more attractive than Summercrest with a skin color equal to Sunhigh and smooth as velvet. The tree is a vigorous grower, and productive. The fruit is excellent for freezing and canning. This promising variety is a real competitor for Summercrest.

SUMMERCREST (N. J. 94)

A large, oval, yellow-fleshed freestone ripening just before Elberta. A popular home canning peach. The tree is vigorous and hardy. An excellent variety to precede Elberta.

WHITE HALE (N. J. 63) (U. S. Plant Patent 31)

A large to very large, firm, white-fleshed freestone of good quality ripening with Elberta and J. H. Hale. The tree is more vigorous than J. H. Hale and the flowers are perfect. It meets the demand for a large, showy, white-fleshed peach during the Elberta season.

LATE VARIETIES RIPENING AFTER ELBERTA

AFTERGLOW (N. J. 84)

A large, high-quality, yellow-fleshed freestone ripening immediately after Elberta. The trees are vigorous, hardy, and productive. An excellent variety to prolong the Elberta season.

LATEROSE (N. J. 109)

This is now the most popular white-fleshed freestone ripening a few days after White Hale. It set a crop in some orchards in New Jersey in 1947 when other varieties failed or set a very light crop. It has high quality for canning and freezing as well as for slicing fresh.

GOODCHEER (N. J. 152)

A large, yellow freestone of good quality, ripening about a week after Elberta. A promising variety to prolong the Elberta season.

AUTUMN (N. J. 145)

The latest, large, yellow freestone ripening fully ten to fourteen days after Elberta. Later than Late Crawford, or Rio-Oso-Gem. The tree is a very vigorous grower and should be planted on well-drained, good peach soil.

GRADES AND PRICES, FALL 1947-SPRING 1948

<i>Grade</i>	<i>1 to 10 Trees</i>	<i>11 to 25 Trees</i>	<i>26 to 100 Trees</i>	<i>101 to 250 Trees</i>	<i>251 to 500 Trees</i>	<i>Over 501 Trees</i>
18 to 24 inch.....			\$0.75	\$.60	\$0.50	\$0.40
2 to 3 feet.....			.80	.65	.55	.45
3 to 4 feet.....	\$1.50	\$1.25	.90	.80	.65	.55
4 to 5 feet	1.50	1.25	.90	.80	.65	.55
5 to 6 feet.....	2.00	1.50	1.15	1.00

These prices include truck delivery to some central point in New Jersey, such as Moorestown, Hammonton, or Glassboro, if the number of trees ordered makes such delivery practical. Trees also may be secured at the C. H. Steelman Nursery on the Clarksville-Port Mercer Road, about one-quarter mile from State Highway Route 26, or U. S. Route 1. Telephone Princeton 1935-J-1. Small shipments to distant points, including all orders for less than 25 trees, will be sent by express collect unless otherwise specified on the order blank. Write for special prices on orders for over 1,000 trees.

PLACING ORDERS

All orders for trees should be sent to the New Jersey Peach Council, Inc., R.F.D. No. 3, Princeton, New Jersey. Orders for Fall delivery will receive first consideration.

A deposit equal to 10 per cent of the total cost of the trees is required with each order and the balance before delivery.
